

BERSOLWAX

Description:

Bersolwax is a **latest-generation ceramic car shampoo with wax** by Fra-Ber, a “wash&wax” with SiO₂ **that washes, polishes and protects** car paintwork. It effectively cleans and lubricates, enhancing gloss and protection even on untreated vehicles.

- **Washes, polishes and protects:** its special formula cleans surfaces while at the same time enhancing gloss and protection. It generates stable and consistent foam and is the ideal solution to speed up the washing process, combining the shampoo and sealing stages in a single step;
- **Rapid water-repellent effect:** it creates a water-repellent effect already noticeable during rinsing;
- **Concentrated:** the product has a high concentration of active substances and is sold as a concentrate to be diluted before use, with 1 L of product yielding up to 50 L of ready-to-use solution;
- **Multi-format:** it is available in both a 1 L and 4.54 L format;
- **Suitable for all vehicles:** it can be used on all types of vehicles including sports cars, utility vehicles, vans, camper vans, trucks and motorbikes.
- **Without added EDTA and NTA*:** The formulation takes into account the main environmentally hazardous substances to be avoided such as EDTA and NTA.

* May contain traces.

Direction for use:

We recommend using Bersolwax with bucket washing, although it can also be applied with a pressure spray pump and foam gun, if necessary.

Main steps:

- If a pre-wash has already been done, we recommend bucket washing.
- Make sure to remove any bracelets or wristwatches to avoid accidentally scratching the bodywork during washing;
- In a bucket, dilute between 20 and 30 ml of Bersolwax per litre of water;
- Stir to homogenise the solution before use;
- Use the resulting mixture with a mitt or clean sponge;
- Rinse with plenty of water, from top to bottom.

If applied with a pressure spray pump or bucket: dilute to a ratio between 1:32 and 1:49, i.e., use between 30 ml and 20 ml of product and top up with water (between 970 ml and 980 ml) to obtain a 1 L ready-to-use solution.

If applied with a foam gun and foam lance: use either pure or diluted up to a ratio of 1:3, i.e., use up to 250 ml of product and top up with water (750 ml) to obtain a 1 L ready-to-use solution. During application, the actual dilution ratio may reach between roughly 1:15 and 1:60.

Warnings:

When handling the product, observe the advice on the safety data sheet.

Technical features:

Appearance and color: pink liquid

Odour: grape and grapefruit scented

pH: 5,0 ± 0,5

Flash point: > 100°C
