

BRAKE & METAL

Description:

Brake&Metal is a **spray brake cleaner designed to clean all types of disc brakes, drum brakes and callipers**, removing oil, grease, tar, hard deposits and carbon residue. Main features:

- **Quick cleaner:** it removes dirt from car or motorbike brake callipers and dries quickly without leaving oily residue;
- **Deep degreasing without disassembly:** it deep-cleans, dissolving grease, oil and carbon residue without needing to pull apart the internal components, thus saving time and effort;
- **No corrosion of rubber or metal:** it is safe on both materials, making it suitable for cleaning electrical contacts and electrical equipment in general;
- **Also suitable for cleaning mechanical parts:** it can also be used to clean gears, chains, guides, pins and spare parts before assembly and sealing operations;
- **"360°" valve:** a special valve is available to allow the product dispensing also when the bottle is tilted, thus facilitating application in awkward or difficult-to-reach positions;
- **Suitable for use in modelling:** it is an excellent solution for cleaning mechanical metal model parts, effectively removing any residual dirt caused by use.

Direction for use:

We recommend using Brake&Metal as a spray brake cleaner.

Main steps:

1. Shake before use;
2. Spray the product from a distance of 20 cm;
3. The special 360° valve allows the product to be dispensed even by tilting the bottle, to allow application in awkward or difficult-to-reach positions;
4. Wipe with a clean cloth if necessary.

Use: use the product pure.

Warnings:

When handling the product, observe the advice on the safety data sheet.

Technical features:

Appearance and color: colorless aerosol

Odour: typical

pH: not applicable

Flash point: < 23°C

Relative density: 0,6 g/cm³ ± 0,05

Solubility in water: soluble

Oil Solubility: partially soluble

Storage:

In unopened package and stored away from direct sunlight and frost.
